Dubin Family's HGA House to Receive Net Zero Building Award

Former Burned Down Home Becomes Model of Net Zero Energy Living

Sr. Project Manager Tim Dalene, Architect Ric Stott, and Mary McPartland to Accept Award for Dubin Family

SOUTHAMPTON, N.Y.--([BUSINESS WIRE](#))--On Thursday, May 13th, Kevin Law, President & CEO of the Long Island Power Authority will present the Net Zero Residential Building Award to the David Dubin family of Southampton, New York. The award will be accepted by Sr. Project Manager Tim Dalene LEED AP of Telemark, founder of The Hamptons Green Alliance; architect Richard Stott, AIA, LEED AP of Flynn+Stott Architects, who designed the home; and Mary McPartland of SunStream USA at 12:00 Noon at the NY Solar Industries 2010 Conference at the Crowne Plaza Center in Albany, New York.

The amazing home came to be by unusual circumstances. In December 2008, the family home of David & Sandra Dubin was destroyed by fire. The family – including the Dubin's three children – also lost all of their belongings. It was a difficult time but with the help of the Hamptons Green Alliance, a consortium of green craftsmen founded by Telemark executives Frank Dalene and Bob Morsch; and architect, Richard Stott of Flynn Stott Architects, the family soon learned that the home would be reborn as one of the first provable models of net zero, carbon neutral green living. In spring 2010, all of the plans that were laid in early 2009 became a reality when the house was returned to the Dubins. Today, this technologically-advanced home features green innovations such as a super insulated shell, geothermal heating and cooling, evacuated tube solar thermal hot water, thin film photovoltaic solar power, LED lighting, and a rain water harvesting system to name a few. For more information on the home, visit www.hgahouse.com.

ABOUT THE HAMPTONS GREEN ALLIANCE

The Hamptons Green Alliance (HGA) is an association of building and related-service professionals in the Hamptons on Long Island organized to promote green building and maintenance practices. Founded by Telemark's Frank Dalene and Robert Morsch, HGA provides information on materials, systems and best – practices for building, maintaining carbon-neutral, zero-energy homes and ecological landscapes via its website and other public forums. Members are leaders in their respective fields. HGA's goal is to be a resource for proven green and ecological practices and is driven by a commitment to use the alliance's combined expertise to make the planet greener. For information, visit www.hga.com. Information on Telemark is available at www.telemarkinc.com

ABOUT THE NEW YORK SOLAR INDUSTRIES ASSOCIATION

The New York Solar Industries Association is the only statewide non-profit membership and trade association dedicated solely to advancing the solar industry in NY State. The website is www.nyseia.org.

ABOUT FLYNN + STOTT ARCHITECTS, P.C.

Richard Stott, AIA, LEED AP presently sits on the NY State AIA Board of Directors and is a member of the National Council of Architectural Review Boards (NCARB).

He served as President of the East End Section, Long Island Chapter of the American Institute of Architects (AIA) in 1997. In addition, he was the founding Chapter President of AIA Peconic, serving in this position in 2006 and 2007, and remained on the Executive Board in 2008.

The firm is also a member of the American Institute of Architects Committee on Architecture for Justice, the United States Green Building Council, and the American Solar Energy Society.

Flynn+Stott Architects, P.C. integrates a variety of efficient and environmentally responsible technologies including:

Solar Air/Water Heating

Photovoltaic Energy

Geothermal Heating and Cooling

Passive Solar Design
